DETAILED ACTION

1. The amendment filed 8/5/2003 (paper no. 19) is acknowledged and entered into the record. Accordingly, claims 2,3,4 and 5 are cancelled without prejudice or disclaimer and claim 7 is newly added.
2. Claims 1, 6 and 7 are therefore pending and examined on the merits.

NEW ARGUMENTS

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1, 6 and 7 are rejected under 35 U.S.C. 102(e) as being anticipated by Bandman *et al* (US Patent 6,203,979). Claims are drawn to a method of detecting the presence of lung cancer in a patient comprising measuring the levels SEQ ID Nos: 2,3,4,5, or 6, and comparing said levels of the polynucleotide of patient with that of a control, wherein an increase is over the control is associated with the presence of lung cancer (claim 1). The claims are further limited to the polynucleotide comprising SEQ ID No: 3 or 6 (claim 6), and the polynucleotide comprising SEQ ID No: 3.

Bandman *et al* teaches a method of detecting and quantitating a polynucleotide sequence encoding HUPM (see column 6, lines 8-10 and column 33-34), of which is 100% identical to that of SEQ ID No: 3 taught in the instant specification. It is also taught that the detection must be accompanied with a comparison with normalized controls (see column 35, lines 12-14). Furthermore, Bandman *et al* contemplate the use of the method for the detection and diagnosis of cell proliferative disorders of the lung (see column 34, lines 25-40).

All other rejections are withdrawn in view of the applicant's amendments and arguments thereto as set forth in Paper No. 13.

Conclusion

6. No claim is allowed.
7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

Art Unit: 1642

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
